Ambassadors Extras

The Maths Book
The specific text featured in the painting is Peter Apian’s ‘New and Reliable Instruction Book of Calculation for Merchants.’
The book begins with the word “Dividirt” meaning “Let division be made.”

The Floor
On the floor based on Westminster Abbey, an inscription refers to the ‘macrocosm’ – a reference to the universe and humanity’s contrastingly small place within it.

The Celestial Globe
The heavenly globe is by Johann Schoner, a leading astronomer of the early 16th century and often produced as part of a pair, thus it is accompanied by a terrestrial globe here.

The Liberal Arts
The study of seven Liberal Arts made up a Master’s Degree in Medieval times: geometry, music, architecture, astronomy, arithmetic and for a Bachelor’s Degree: grammar, rhetoric, logic; all of which are alluded to here as representing the subjects of the university curriculum.

The Protagonist
De Dinteville spent most of 1533 in England, waiting for the coronation of Anne Boleyn. He was miserable in England, missed his family and the cold and damp made him ill. He wrote to his brother: 'I am the most melancholy, weary and wearisome ambassador that ever was seen.' Perhaps as an antidote to melancholy and the English weather, one of the first things he did on his arrival was to import ‘thirty tuns of Gascon wine’.
